

THE VIRGINIAN

THIS HOME was twice the American Home Magazine award as "Best Home For the Money" in the Washington area. This reflection of the Economy of Quality built into "The Virginian" guarantees good living for you and your family for many, many years. We designed this home with not only an eye for the best use of the best materials and products . . . but, also, an eye for dignity, good taste and proportion—items which we are continually conscious of in our homes. Our success is your good fortune. Here are

a few features: four bedrooms, two full baths plus rough-in for future lower level lavatory; 14 foot dining room; daylight family room with outside entrance; beamed ceiling corner kitchen; full basement and stairway to large floored attic; and lots of closet space. A partial excerpt from our award states "In recognition of an outstanding contribution to better housing . . . distinguished by excellence of design, efficiency of floor plan, superior workmanship . . ." This is a fine home . . . come and see it.

KETTLER BROTHERS, INC. . . . building the "Economy of Quality" into every home
